

RAYMOND RECORDER

VOL. 15 No. 11

Thursday, March 11, 1948.

Funeral Service For John F. Salmon

Funeral services for the late John F. Salmon were held Saturday in the Stake House.

The very large attendance and the many floral offerings showed the respect and love held for this pioneer and the fine family which he has raised.

President L.L. Palmer, M.T. King, T. Geo. Wood and Bishop Rulon Dahl were the speakers and all told of the outstanding work done by the deceased, both in the Church and in the community since his arrival in Raymond in 1903.

Musical numbers were rendered by the combined four wards chorus under W.C. Stone and "The End of a Boy Scouts Day," by Jas. E. Harker.

"The Teachers Work is Done," by a male quartette consisting of Ira McBride, Frank Taylor, Paul Redd and Delbert Oler and Joe McLean rendered "The Lords Prayer." Invocation was by Elder Ray Hardy of Stirling and the benediction by President John A'lon.

The Boy Scouts were present in a group in uniform with Scout Executive Chas Matkin of Magnath, and formed lines, through which the mourners passed into and from the church. All members of the family were in attendance, grandchildren and many friends coming from Cardston, Calgary and many other points in Southern Alberta.

Mrs. T. Holbeck of Lethbridge is visiting here at the home of Mr. and Mrs. Lon Nelson.

Mr. and Mrs. Willis Fawcett had as their Sunday dinner guests Mr. and Mrs. Art Cutler of Lethbridge.

Arthur Erickson has returned home after a two weeks visit in Salt Lake and Mt. Pleasant, Utah.

Mrs. E. Egeland of Calgary spent the weekend here with her daughter Miss Eleanor Egeland and of the local school staff.

Miss Maurine Hirsche has recently returned home from a three months visit, spent with relatives in Provo.

Mr. and Mrs. Quilan Jensen of Provo, Utah, arrived here on Monday last. Mr. Jensen has purchased the Red and White grocery business, owned and operated for many years by T.A. Spackman. The new owner will take over the business, named lately.

The Green and Gold Ball held here on Friday evening was a very delightful and colorful affair. The decorations were extremely attractive and a record crowd attended. Five girls were eligible for queen, being Patricia Brandley, Fay Spackman, Ludene Seeley, Evelyn Barton and

Hazel Hayley, who drew the lucky number and was crowned Queen of the Gold and Green Ball by her sister Doreen who was last years queen. The M.I.A. officers are to be complimented on their very successful party. A party from Raymond, representing the M.I.A. Stake board were Mr. and Mrs. Frank Taylor, Mr. and Mrs. Joe Strong and Mr. and Mrs. Fredan Dahl. The Warner band furnished the music.

The local cafe and billiard room has recently changed hands. Mr. and Mrs. Julius Larson have purchased the business from Mr. Harold Nilsson former owner and proprietor.

Mr. and Mrs. Harold Oler of Taber visited here over the weekend at the home of Mrs. Jesse Oler.

Larry Junior has returned to his R.C.A.P. station after spending a fur long with his family here.

NEWS NOTES

SUPPER PARTY

Mr. and Mrs. Howard Rasmussen were hosts at a supper party Saturday night at their home. Twenty guests were present and honors for rook went to Mrs. Muriel Terry and Aeron Sommerfeldt with consolation going to Mrs. Ruth Gibb and Howard Mclellin.

Mrs. Bernice Weaver suffered a very painful accident Saturday morning when she caught her hand in the wringer of the washing machine. No bones were broken although her hand and forearm were badly bruised.

Taxes Up Four Mills This Year

Re-organization meetings of both the Town Council and the School Board have been held and complete. The School Board recently brought down their budget and handed their requisition to the Town authorities. After receiving the School requisition the Town Council met to draw up their budget for the coming year and set the mill rate for 1948 which was set as follows:

Town	21 mills
School	30 mills
Hospital	1 mill
Sewer	3 mills
Total	55 mills
Business tax	24 mills
The School mill rate is up 1 mill this year as a result of increased cost of operation of the Raymond School district.	

The School mill rate is the only change in the tax set up for 1948. With the cost of everything going up members of the board found it

impossible to operate the schools this year without an increase. Teachers salaries, cost of fuel, text books and supplies, material for repairs and nearly everything on the school budget are governed by outside prices which are going up every month.

An ambitious program of improvement has been outlined by the Council for 1948. This should be a good year for improvements in Raymond. Municipal authorities have not yet met to set the mill rate for this year.

PASSENGER CAR AND DRIVER'S LICENSES.

Car and Driver's licenses, for the year 1948-49 will be on sale at The Treasury Branch, Raymond, on and after the 15th of March, 1948.

FIRST BRITISH DIESEL ELECTRIC LOCOMOTIVE
Locomotive number 10,000, publicly shown at Euston recently, is British Rail's first main line Diesel Electric locomotive. Designed by Mr. H. G. Ivatt, M. I. Mech. E., the locomotive is the first of two identical units to be constructed, each having a Diesel engine of 1,600 h.p. and a driving cab at each end. It is planned to use both units coupled together to give 3,200 h.p. to haul express on the Euston - Glasgow main line, when the

EXPRESS LOCOMOTIVE
second unit is completed. Meanwhile after preliminary trials, No. 10,000 will go into regular fast passenger service between London and Derby and London and Manchester. The unit in the new Diesel locomotive is a 16 cylinder V-type Diesel, the largest yet manufactured by the English Electric Company. Maximum engine revolutions 750 r.p.m. for maximum tractive effort 41,400 lb.

Mrs. John Christian Laid To Rest

Sunday afternoon at the Stake House, funeral services were conducted for Mrs. Ingvalder Christian, with Bishop J.O. Hicken in charge. The choir, under the direction of Mrs. Beth Walker with Mrs. Ethel Topestrup at the organ rendered the hymns, "Oh My Father," "Sometime We'll Understand" and "I Need Thee Every Hour." Mrs. Evelyn Melchin and James E. Harker sang a favorite hymn of the deceased, "In the Garden."

Speakers were Mrs. Emma Reid, a neighbor for many years, Mrs. Viola Wing, a visitor for many years, and C.E. Allred. All spoke words of comfort and encouragement to surviving members of the family. Mr. Alfred told of her life in Iceland, her mother having left her there at the age of seven to come to America. Her mother, the late Mrs. Evanson was known to many Raymond residents. Mrs. Christian joined her mother later in Utah, afterward the family coming to Canada.

All of the children but three were present at the funeral, also many relatives and friends from Montana and Taber.

Mr. Elmer Johnson of Butley, Idaho, a son of Mrs. Christian by a former marriage could not get here in time for the funeral but arrived in Raymond with his wife and son and daughter in law soon after. They will visit here and in Taber for a few days.

Mrs. Thordis McDermott of Sunburst and Mrs. Vigdis Valgardson of Taber, daughters of the late D. M. Johnson of Raymond were among those here for the funeral of their aunt.

PRO WRESTLING BOUT

On Friday, March 19, a Pro Wrestling Match will be staged in the Lethbridge Roller Barn, when Babe Sbarkey, 265 pounds, of Galveston, Texas, former World's Champ, will meet Ronnie Etchinson, 240 pounds from Dallas, Texas.

The Semi Windup will feature Chief Thunder Bird, 240 pounds vs. Larry Tillman, 220 pounds.

Legion Notes

Recent contributions to the Legion Memorial Hall Building Fund are gratefully acknowledged as follows:

Hungarian Sick Benefit	\$25.00
Meldrum Brothers	25.00
Walter Zebell	10.00
Paul Schneider	5.00
H.P. Schneider	5.00
Total	\$70.00
Previously acknowledged	\$700.00
Total to date	\$770.00

An enjoyable Legion social for War veterans and their wives was held in the Opera House on Wednesday, March 10th. In addition to the dance that went on well past midnight, a short program and refreshments marked the evening. However, due to some other event that was carried out in the Stake House on the same night attendance of the social was not as large as it would have been otherwise.

Plans are well advanced with the preparations for the exhibition of Japanese Judo by the best athletes of the district that will take place in the Opera House on Saturday, March 27th. This event is organized in support of the Legion Hall now under construction. The public is advised to watch for further announcements on this forthcoming show.

Lethbridge Experimental Station WEEKLY LETTER

BALANCE IN CROP PRODUCTION UNDER IRRIGATION.

The successful irrigation farmer knows the advantage of being able to control and apply water to his crops when needed. This gives security to irrigation farming and makes possible a high degree of intensive agriculture under the ditch. Successful water users also know the importance of fertility through the use of crop rotation, green manure, barnyard manure and commercial fertilizer.

Investigators have found that in order to obtain maximum yields and quality it is necessary to keep the main soil factors in proper balance, principally moisture, organic matter and fertility. The principle involved (continued on back page)

Local Happenings

Ladies Music Club met last week at the home of Mrs. Emma Dahl for their monthly meeting. The time was spent in voice culture and singing practice led by Mrs. Marie Matkin. Mrs. Midge Fairbanks was assistant hostess. Sixteen members were present.

Mr. and Mrs. Reg. Cooper left on Thursday for Calgary where they motored Mayer and Mrs. Wm. Cooper. Mayor Cooper will go through the clinic while there.

Business Girls Club met at the home of Miss Lucille Larson last week. Miss Larson was presented with a birthday gift during the evening.

BORN — To Mr. and Mrs. Ben Knudt, a son.

Other patients in the local hospital include the infant daughter of Mr. and Mrs. L. E. Campbell and the baby of Mr. and Mrs. Floyd Harrison.

Little Judy Terry has left the hospital very much improved.

are pleased to learn of the continued. The many friends of Hamp Wilbeck improved following his serious illness.

Members of the Child Psychology Club met Wednesday night at the home of Mrs. Mary Rasmussen. The lesson "Rewards and Punishments" was ably given by Mrs. Muriel Terry. Mesdames Eunice Snow, Idale Kenny, Mabel Pack, Deleta and Helen Sommerfeldt were special guests. Mrs. Beth Galbraith was assistant hostess.

Mr. and Mrs. Norman Allred and family who have been living in Coaldale have returned to Raymond to make their home.

Mrs. L. E. Palmer and Mrs. Rulon Dahl returned home Tuesday after spending the week end in Edmonton visiting their daughters who are attending school there. While in the city they attended the ballett Revue. Among those appearing in the Revue were the Misses Dona and Mona Palmer, Marie Dahl and Peggy Davis. Miss Davis doing some very fine solo work.

Mr. and Mrs. Ted Meeks entertained 30 guests Friday evening. Winners at hearts went to Mrs. Vella Holt and Ralph Meldrum and consolation Mrs. Jean Rolfsen.

FIRESIDE HELD

An M Men and Gleaners Fireside was held in the 4th ward at the home of Heber Allen last Sunday evening. Members of all four wards were present. Grant Payman and June Anderson told of some of their recent missionary experiences. The remaining time was taken up by President Palmer as a question period. A lunch was served and a good time was had by all.

BORN — To Mr. and Mrs. Mose Fromm on April 12th, at the Municipal hospital, a daughter.

READERS PROGRESS CLUB MEET

The Readers Progress Club met Wednesday at the home of Mrs. A. Cooper with Mrs. Martha Taylor as assistant hostess. An interesting review was given by Idale Kenny, of Agnes Newton Keith's "Three Came Home", a story of the author with her husband and baby son of three years spent in a Japanese Prisoner of War camp. In the absence of president Betty Watson Vice president Olive Fisher took charge of the meeting. A sum of money was voted by members to be donated to the fund for food for British children. The afternoon closed with a lovely lunch being served by the hostess. Special guests were Mrs. Jennie Vance and Mrs. Eunice Snow. Eighteen of the twenty members were present.

The Hungarian Sick Benefit Committee wish to extend their very sincere thanks to everyone who donated to and to everyone who attended the chicken supper in aid of the under privileged children in Europe, 250 attended the banquet which was held last Tuesday in the Hungarian Hall.

Male Chorus Organized

With the organization of a 30 voice male choir in Raymond, the Sugar City has good cause to be proud of yet another of its many music clubs and singing groups.

This latest addition fills a long felt want for a chorus of male voices, and is a source of pride to the organizer, Ira McBride, who has been chosen manager of the vocal ensemble.

W.C. Stone has been asked to conduct the group and under his direction it is proposed to make this one of the outstanding musical organizations of the south. Elementary training in voice production and studies of the various aspects of music will be part of the weekly program in connection with rehearsals. Emma Dahl is the accompanist.

Mr. McBride is confining the enrollment to 30 singers and hopes to include a program that will make a social and service setup that will provide wholesome fun and recreation for singers, besides the joy of singing. At some of the parties, the wives and sweethearts of members will participate.

The following is the personnel of the 30 voice choir:

First Tenors: Ira McBride, T.K. Roberts, Cyril Layne, Jerome P.D. James Weaver, Joe Strong, Howard Rasmussen, Alma Summerfeldt. Second Tenors: James Harker, Wm. Fairbanks, Godfrey Holmoe, LeRoy Stone, Harold Stevens. Baritone: Myron Holmes, Charles Hiltner, Frank R. Taylor, Paul Redd, Joseph McLean, Wesley McMillin. Basses: Carl Gemlich, Axel Stovenson, Derald Stone, T.W. Meldrum, Jim Hiltner, Ken Stone, Dean Rolfsen, Ellys Peigrass, Leroy Anderson, Fredan Dahl, J.O. Hicken.

At present, no more than 30 will be allowed to join this Raymond Male Chorus. Other officers will be elected next Monday evening at the weekly rehearsal in the Strake house.

Editorial

OPEN LETTER TO ALL MEMBERS OF THE LEGISLATIVE ASSEMBLY OF THE PROVINCE OF ALBERTA.

Dear Sir or Madam:

The Alberta Educational Council wishes to express the appreciation of its member organizations for the increased Provincial grants to education resulting from the action of the Legislature at its last session.

At the same time it is necessary to point out that the increased cost of operating schools during the current year are such that local boards are experiencing great difficulty in meeting them. It is not out of order to reiterate that local taxes have reached a dangerously high level, and that additional revenue from such sources cannot be expected. In many divisions the school bus has added heavy capital and operating expenses to an already heavy financial load and a huge building program, urgent though it is, has had to be postponed. It cannot wait much longer.

Today hundreds of schools are with out qualified teachers. It is essential that everything possible be done to right this situation. Among the factors to be considered in this respect are:

- (a) Salaries adequate to attract and hold the most capable people.
- (b) Substitution of an adequate provincial salary schedule for the more than 200 individual schedules at present in operation.
- (c) The establishment of a satisfactory pension scheme.
- (d) The provision of good teacherages where necessary.

All of these involve increased expenditures which it is impossible to meet from the proceeds of a direct tax on real property. We therefore ask you to support and to campaign for school grants which will meet at least 50% of the costs of elementary and secondary education.

The children of our province are our greatest asset. They must be educated to assume and discharge the responsibilities that will soon be theirs. We have no hesitation, therefore, in asking your assistance in

playing their education on a sound basis.

You cannot afford to let these children down.

Yours very truly,

(Signed)

H. E. SPENCER.

E. C. ANSLEY

J. M. WHEATLEY

A. G. McCALLA.

M. E. BUTTERWORTH

The need for the Government of the province to assume higher percentages of the cost of education is very strongly felt in Raymond this year.

In the recent requisition handed the Municipal and town authorities the School District are asking for an additional \$10,000 to cover operation of the Raymond schools for the 1948 year. Of course this has resulted in an increased mill rate for school purposes. Taxes are high enough now that people feel they are standing just about the limit. The cost of education has to be met regardless and the only way is through direct taxation of real property. The tax for school purposes in Raymond this year will be 36 mills whereas last year was 26. The only other source of relief from such heavy demands upon the tax payer is that the government be persuaded to shoulder at least 50 percent of the cost of education. The above quoted letter is a letter that the Alberta Educational Council wrote and along the same lines, the school board, the town council and the Municipal council have all contacted their M.L.A. stating the facts and urging that the government assume at least 50 percent of the cost of education. All civic organizations, councils and organized education units have written their M.L.A. asking support in the above request. All organizations in the Town of Raymond and all citizens should get behind the request and sign their name in a united effort to gain the governments consent of the proposal. If the voice of the people of Alberta is raised unanimously and loudly in support of larger government grants for school purposes no doubt action

GEORGE A. FAIRBANKS

Another well known pioneer family of 1902 was the George A. Fairbanks family.

Mr. and Mrs. Fairbanks were born in Payson, Utah, and their three first children, Harold, LaVern and Vilate were also born in Payson. They came to Raymond April 15, '02.

To Mr. and Mrs. Fairbanks ten children were born, five boys and five girls. Two of them died in childhood. Four of them, Walter, Sam, Georgia and Vilate, live in California while Harold, William, LaVern and Paul live in Raymond and are active progressive citizens. The Fairbanks brothers own and operate one of the most up to date stores in this locality of the south.

George Fairbanks was a very efficient teacher in the organizations and in priesthood quorums. November 16, 1904 he was sustained ward clerk of the Raymond Ward. He was a school teacher and was of a literary turn of mind and during his leisure hours he wrote a book which he called "The Progress of Man". He also left for his children a note book full of poems. Some on the serious side of life such as "The Creation" and some of them showing a keen sense of humor, for example: "The Ice Cream Cone"

This cone is a fake Compared to a cake, Yet designed for service It really makes you nervous. For it crackles and creaks As you fumble it to eat, And its insipid taste Disappears with no haste Were it not for the nigget It holds at the top You would become disgusted And soon let it drop."

The old Fairbanks two story home in Payson still stands and is used for family reunions etc. It was built in 1853.

John B. Fairbanks, gifted Utah Artist is a brother of George and was Raymond's first photographer. His photograph gallery was just north of King Bros. store and south of J.O. Chumee's grocery store. Many of the old photographs of early parades, of the old time buildings and of early pioneers were taken by this gifted man. How well we remember the beautiful paintings hanging on the walls of his shop.

Dr. Avard Fairbanks, internationally renowned sculptor, a son of John and Nephew of George, is at present teaching art in the University of Utah, coming to Salt Lake City from Ann Arbor, Mich. where he was associate professor of Fine Arts

would be forthcoming.

In the year ending December 31, 1945 total expenditures for that year were \$60,106.84, while in the year ending December 31, 1947 total expenditures amounted to \$82,100.38. This shows that the cost of education to the people of Raymond has increased \$21,993.54. With another \$10,000 increase this year the tax payer really carries a load. Real property is taxed to the limit and the educational standard all through the province is due for a serious setback unless relief is brought from some quarter. That source of relief is from the government and if the government can be persuaded to see the situation in the light of the people's point of view then we will again be able to step forward and keep our educational standards second to none.

Stone's

He is the father of eight sons. While he was yet a small boy he lived with his father here in Raymond Roy, Avard's brother also lived here and played the Trombone in the Pral O'Brien orchestra in 1909.

Another brother of Avard and noted artist is J. Leo Fairbanks who is at the head of the Art Department at the Oregon State College.

Frank, another brother of George, lived here in pioneer days, his wife Minnie being one of the first, if not the first milliner in Raymond. Henry another brother was the first Reeve in the little village of Raymond.

He was the father of John, Charles, the former Mrs. Hawkins, Viola LaMar and Czar, the latter two still residents of Raymond. George A. Fairbanks passed away in 1943.

The following sketch was submitted by Mrs. Ann Fairbanks shortly before her last illness:

"We sold our possessions in Utah and came to Canada, arriving here about April 15, 1902 with our three children Harold, LaVern and Vilate. Mrs. Arthur Dahl travelled with us and it was rather a tedious journey as we came on the narrow gauge railroad, the Turkey Trail. I think they called it. But that was the only means of transportation at that time. Arthur Dahl met us at the station and took us to the home of Warren Dewey where a lovely dinner was awaiting us and where we stayed over night. It really did look beautiful here with the grass so green which covered the prairie, but I all that I was homesick and felt like I would like to have gone right back."

We went to live in the Henry Fairbanks home when we were settled.

It rained for two weeks and almost washed us out. After it had cleared up, one day the cattle came stampeding up the road and we all wondered what had happened, but it wasn't long before we found out, as in a short time our house was filled with mosquitos. The cattle were really mad and I was almost mad too. Well, we set to work, bought a lot, and built our first house in Raymond. We planted a good garden which gave us wonderful results. We also planted our wheat and for three years our crop froze which was very discouraging. There were not many people here at that time, but the town soon grew. We busied ourselves in church activities. My husband George Fairbanks taught in the different organizations and I in Primary and Relief Society which we enjoyed very much. I feel we were real pioneers as there were a lot of difficulties to be overcome but I guess those are the things which bring out the best that is in us."

While in conversation with Mrs. Fairbanks, it was interesting to discover that at one time she was assistant organist to John J. McClellan of Payson Utah, but who later became the famed Salt Lake Tabernacle organist, and when he went to Europe to study music Mrs. Fairbanks then Miss Ann Worsenroft, took his place as organist, a position she held for seven years. She was also organist in Relief Society under Margaret H. King. In 1916 she was sustained second counselor and February 12, 1918 first counselor to Margaret H. King which position she held until January 9, 1923. She was also counselor to Gertrude Hicks in the Primary Association. When she was 18 years of age she was president of the V. L.M.E.A.

Mrs. Fairbanks passed away last November 4, 1947.

LaVern F. Anderson has in her possession a very interesting booklet with the caption thus: "Yo Obie Fayerbanke House, Dedham, Mass., Built in 1636. This rambling picturesque old house is believed to be the oldest frame house now standing in the United States. After a lapse of nearly three centuries it is still standing and owned by the lineal descendants of Jonathan Fayerbanke and is the mecca for thousands of tourists every summer from all over the world."

On one page with photograph of this giant old house, it reads "The entire length of the house including the wings, is seventy-five feet. The main or middle part has a pitch roof extending down over the lean-to at

the back to within a few feet of the ground." Another page with pictures of an old rock well: "For more than 250 years this old well was the principal supply of water for the eight generations of the Fairbanks family who have occupied the old home".

Herbie Wilde

My Week

by R. J. Deachman

An American girl employed in the United States Embassy at Moscow resigned the other day and announced that she had been married to a Russian operatic baritone for the past thirteen months.

She expressed the opinion that the Russians were a very fine people, who loved their country, their children and their church and had no desire whatever to interfere with other people. She did feel that there was a touch of suspicion so far as the American Embassy officials were concerned in their relations with Russian officials.

I understand this situation perfectly. The man she married was probably interested in his art, had very little to do with the government was not concerned with politics, and so far as these matters were concerned accepted just what he was told.

The members of the American Embassy would be in contact with Russian government officials and there might be a touch of suspicion on both sides. They would approach each other at arms length, perhaps with minds closed. It's difficult to do business that way. If you want to get the other point of view—the open door policy—visit as I have done an American agricultural college and ask to see the works. They will show you everything—the whole place is yours, that's the right way, the only way.

What is the reason for all this? A meeting of minds should be a meeting of minds but is it possible for that to take place where one represents a totalitarian government and the other a democratic form of government. The trouble is we never know what is in the mind of the totalitarian. We know as little about it as the common people of Russia or something less than nothing. The citizen of a democratic government has some conception of the things which are going on around him but the average Russian peasant and the average Russian operatic baritone hasn't the foggiest idea of the mind of the Russian government. It is hidden and inscrutable. How can we be free with a people who do not understand and where the government gives not the slightest inkling of its intentions.

I have received some delightful letters during the last few days. They have given my heart and mind a lift. One of them came from Hamilton, Ont. He had read an article of mine dealing with the House of Commons in which to a certain extent I defended that much criticised body and suggested that after all we, the electors, were not entirely free from criticism. Here is what he writes:

Hamilton Ontario,

March 1st, 1948.

Dear Mr. Deachman:

I read one of your recent articles. Like you, I have faith in our form of Parliament. I believe that it is so constructed that it is able to better itself. Governments do make mistakes, and a times costly ones. No form of government could be perfect. But I would not trade our Parliament for any other in the world. We have only to read our papers, listen to our radio or travel to other lands to appreciate it.

True, many people will criticize our governments and run them down and that makes me more firm in my belief. I do not know why my fellow workmen do not respect our parliament.

The best improvement in our system of Parliament would be to have every citizen thinking and being concerned with his obligations.

Keep up the good work. Please let me know how I can understand more about our Parliament.

Yours truly,
R. E. O.

A man from Sault Ste Marie, Ont. brings another thought: Canadians could improve the House of Commons if they would turn out 100% to vote, vote, vote.

If every able bodied man and woman, come hell, come high water, voted then I'll bet a bookie there would be a better parliament elected. Why do I think so? Because the candidates would have to be able to speak up and tell why they should be elected and when elected they would work, because they would know that their election depended upon their conduct.

There's a strong point. If the constituents were keenly interested in the House of Commons, they would be a driving force behind the members. Perhaps they do not need to be interested. It may be that they work as if the eye of the master was always on them. Maybe not but the task of an M. P. is a difficult one, and the voter should not expect

too much.

That indefatigable organization the Foundation for Economic Education at Irvington-on-Hudson, New York, has published an interesting book lately entitled 'Why Kill the Goose'. The author is Sherman Rogers and he does a bright job in exploding a number of fallacies. He points out that the American people seem to like these fallacies and never enquire as to the basis of their existence. I am very sorry for the Americans. We are touched with the same disease. Some day I am going to review that book, this is only a casual reference to those common fallacies we Anglo-Saxons cherish as part of our natural heritage.

KEEP DOWN THE COST PER ACRE

► The oil you use in your tractor is your insurance against breakdowns, delays and costly repair bills. Using the right grade of the right oil will definitely keep down your cost per acre.

That is why we recommend MARVELUBE Motor Oil. It is recognized as Canada's leading motor oil—used in more farm machines and motor cars than any other oil you can buy.

Why take a chance on inferior quality when you can use the leader at no extra cost? Fill up with tough, long-lasting MARVELUBE and your engine will stay clean longer and free from damaging deposits. You'll save money in the long run by using MARVELUBE, Canada's favorite motor oil.

MARVELUBE

IMPERIAL OIL LIMITED

OVER A MILLION CANADIANS WILL RECEIVE AN AVERAGE OF . . .

\$45.00

Yes, the average cheque to 1,329,139 Canadians for 1942 Compulsory Savings Refunds will amount to 45 dollars. If you have a refund coming to you, it can mean extra spending money right now or it can provide extra savings for the future. But the very fact that you have done without it, makes this the easiest type of money to save.

Why not put your refund cheque away in a savings account at the B of M? There it will keep on gathering interest. It will be something you will be glad to have to meet tomorrow's opportunities or needs.

1942 Compulsory Savings Refund cheques will be mailed out in mid-March and dated March 31st. But the B of M and all other chartered banks in Canada have been authorized to cash refund cheques any time from the date of receipt.

EXPERIENCE OF PONOKA PROVING PASTEURIZATION VALUE

Proof of the efficiency of pasteurization of milk is seen in a report received recently by the Health League of Canada officials from the town of Ponoka in Alberta.

During a Canada wide survey in connection with milk pasteurization, Ponoka officials reported a compulsory pasteurization by-law had been passed in the town in 1944 "following repeated outbreaks of undulant fever, and when it was found that two of the herds used in supplying milk to the town were seriously infected with Bang's disease." Bang's disease, or brucella abortus, in animals can lead to undulant fever or brucellosis in humans.

It was noted further that, "since then no case of the disease has been reported."

From this report from Ponoka, it is obvious that pasteurization is a means of eliminating undulant fever—a disease the seriousness of which is not revealed in available statistics because of diagnostic difficulties. Undulant fever is a disease which does not show characteristic symptoms.

Nevertheless, undulant fever toll can be cut through the use of pasteurized milk, just as it has been proven that the use of pasteurized milk has cut the toll from bovine tuberculosis, scarlet fever, septic sore throat, typhoid fever, paratyphoid and dysentery, all milk borne diseases.

The example set by Ponoka and some other towns and cities is commendable and encouraging, but the problem of eliminating milk borne diseases throughout Canada can be solved only through enactment by the various provincial legislatures of compulsory pasteurization legislation which covers all municipalities and other districts. Only then will the Dominion be assured of a milk supply which is 100% safe. Ontario at present is the only province with compulsory pasteurization legislation in force.

CLEAN RAW MILK NOT ALWAYS DEPENDABLY SAFE

Many safeguards can be taken to assure clean milk but even clean milk if unpasteurized, can carry germs. Clean milk can be obtained by the following protective methods:

1. Farm control in the form of sanitary inspection.

2. Veterinary and nutritional control

of the herds.

3. Medical supervision of the milkers and handlers of milk.

4. Properly cleaned cows and clean barns.

Clean milk is essential from a sanitary point of view and safeguards health to a certain extent in that from it is eliminated much disease carrying dirt. However, it is not always dependably safe.

Dr. Frank Pedley, of McGill University's medical faculty, has stated that infectious diseases in cattle often occur and contaminate milk between tests which are made only about twice a year. The same is true in regard to milkers and handlers of milk.

Also in connection with clean milk, Dr. John R. Fraser, another member of McGill's medical faculty, says that "milk is one of the most difficult foods to produce, draw, keep, handle and deliver in a clean state. Most foods usually are cooked well enough to kill any harmful or disease producing germs that are in or may get in them, whereas milk, to a great extent is consumed in the uncooked state."

Dr. Fraser added that "unsafe milk has been responsible for more deaths and illness than all other foods grouped together."

"They couldn't walk like other children"

It was a great day at Last Bend when they huddled the little girl with the twisted legs into the waiting plane.

Few people come to Last Bend. Few leave. On the map the place isn't even marked. Dotted lines indicate the river course—aimless in the lives of the crippled children whose poverty-stricken parents owned the two-room shack.

Margaret had been born up there in the bush, about 400 miles south of the Yukon border. It is a tough country, even for hard-bitten woodsmen and trappers. It demands strength and stamina. Margaret had neither. Instead, she had congenitally-deformed hips.

Only fourteen... and helpless. A doctor, explaining matters in lay terms, would have said that they were out of joint—the femurs parted from the sockets. Margaret merely knew that she couldn't walk like other children. Her feet turned outwards at right angles. She moved haltingly, painfully, as if she were very old. But Margaret was just fourteen.

She had been ten when Joan arrived—the little sister of the dark solemn eyes, the quick intelligence.

But a little sister born, like Margaret, with cruelly-dislocated hips.

A school teacher came to Last Bend. Margaret learned something, then, of the world beyond the bush; heard whispered references to hospitals for crippled children. But, of course, her case was hopeless. It always had been.

Into another life

Yet it happened. The plight of Margaret and Joan came to the attention of the Red Cross. One morning a plane landed at Last Bend. Now—in friendly wards among cheerful, helpful children, Margaret and Joan are being treated and schooled. Already Joan is walking better—much is hoped of an operation. Her limbs will no longer be conspicuous—not for her the life of an "ugly duckling".

For Margaret, too, a brighter future beckons—after an uphill fight. Age makes a difference. And 14 years is a long, long time at Last Bend.

When you are asked to "help support the Red Cross", remember: It is to such hospitals and other Red Cross services for the relief of suffering, that your money will go.

Red Cross Services include: Blood Transfusion, Outpost Hospitals, Aid to Sick and Disabled Veterans, Treatment for Crippled Children, Disaster Relief, Nutrition Services, Home Nursing Courses, Swimming and Water Safety, etc.

The work of mercy never ends... Give generously to the CANADIAN RED CROSS

RAYMOND

THE WEEK IN OTTAWA ISN'T THIS TIME

Listening from time to time to various honorable members, one would come to the conclusion that Canadians were poor people, said an MP in the House of Commons, "we hear so many arguments in favor of cheap food, I want to point out, however, that in 1947 Canadians spent \$100,000,000 on alcoholic beverages, \$275,000,000 on tobacco, and \$120,000,000 on movies and cosmetics, which makes a total of about \$795,000,000. In addition the governments paid some \$230,000,000 in family allowances, which brings the total to nearly \$100 a person. It would seem to me then, that people want subsidized food so they can afford luxuries and they want the farmer to bear the brunt of it.

"Canadians must be informed that it is not the farmer who is responsible for the increased cost of living, declared another MP in the House, "It is the spread between producer and consumer over which the farmer has no control that has helped to cause these high prices."

These are typical reactions along Parliament Hill and indicate the trend of thought, with there being little doubt about their significance as the man in the street across Canada becomes more and more concerned about the disappearing value of his dollar in the spectacular rise in the cost of living, especially food.

SHORT RECESS

The intention of the government is to ask for an adjournment on the afternoon of March 24th at 6 o'clock until the following March 30, as the Easter recess of the House of Commons, so that there will be a short recess.

HOUSING PROBLEM

It has been brought out in the House of Commons that the Government has had a strict control on the exports of building materials as well as a policy of trying to encourage producers and manufacturers to increase their output of such material granting even bonuses for the latter purpose and resulting in higher production.

Indeed, as illustrations of the effectiveness of this policy it has been made known here that production of building supplies moved up in all directions in the past year, including the following with the previous years output being given in brackets: lum-

ber, 5 millions of b.f.t. (43%) hot air furnaces, 56,000 units, (43,000), soil pipe and joints, 33,000 tons (26,000) cement 12,100,000 barrels (10,300,000) bricks 290 million (275); glass 70 thousands of sq.ft. (44); walls 78 thousands of tons (60); asphalt shingles 2,100 thousands of sq. bundles (2,100).

These figures speak for themselves and show clearly the rising tide in the production of building materials in Canada where the only real setback in such production last year was suffered in steel pipe, the output of which was about 93,000 tons compared with 98,000 tons in the preceding year.

NO ENCOURAGEMENT

"All sorts of new newspaper enterprises start up", said Trade Minister Howe in Parliament in discussing the Government's control over imports during the present "Austerity" program. "We have already had applications from people who want to bring presses over to start printing pulp magazines in this country which is a type of project that I have said frequently we do not wish to encourage. This is merely to make sure that the money is spent for material that is useful to the Canadian economy."

INDUSTRIAL DEFENCE BOARD

The Government has indicated its intention to set up an industrial defence board for the purpose of advising the Government and the Minister of National Defence on matters relating to industrial organization, it is learned here, and it is expected that an announcement will be made in a few weeks time about it.

DISINCLINED TO DISCLOSE

The United Kingdom Government seems disinclined to allow the publication of telegrams connected with the international position in the Far East before the sending of British and Canadian forces to Hong Kong in 1941, it has been stated by Premier Klug. The British Government held that "the whole system of full and frank communication between Commonwealth Governments would be prejudiced if telegrams of this nature had to be prepared on the basis that they might eventually be published."

MORE HOUSES AND LESS DESIGNS

The National Council of the Royal Architectural Institute of Canada at its 41st annual assembly in Ottawa suggested that the demand is for more houses and not for more designs, adding that a house, under the minimum standards of the National Housing Act, "may not be a thing of beauty but it will be a joy for the period of its physical existence to people who are craving for a roof over their heads."

NARROW MAJORITIES

Some narrow majorities have been recorded in votes in the House of Commons here lately when the opposition was solid against the Government, including two votes of 102-92 on the third reading of the important Emergency Exchange Conservation Act and an amendment to confine the Act's application to so-called "hard currency" countries only defeated by 104 to 96 with these votes stressing the Governments present narrow overall majority of about nine votes.

SAID IN THE CAPITAL

"But I cannot bind the Government to any unconditional guarantee that all produce grown in Canada during 1948 will never have to face any competition from imported goods", said Finance Minister Abbott, offering a hint of possibilities.

"Under present conditions there is no such thing as low cost housing" declared Charles David, president of the Royal Architectural Institute of Canada, here.

"Perhaps Canada in the future is destined to bridge the gap between the United States and the United Kingdom in economic as well as in political matters", said Senator Wishart Robertson, Government leader in the Senate.

"Ottawa Instructions to customs officers should be as judicious as possible and to remove all unnecessary bars concerning tourists entering and leaving Canada", remarked George R. Webb, MP, in a speech in the House of Commons.

"In Europe the time is ripe for some great step forward", British author and lecturer Commander Stephen King-Hall told an audience here, revealing that Churchill, French leaders Blum and Herriot and Western European delegations will meet at the Hague on May 8 in a great "manifestation" for a United Europe.

"If we go on allowing the psychology of boom to continue undisturbed, we will get a bust", commented J. M. Macdonnell, MP, during a debate in the House.

Canadians are petrol-conscious because, with the sole exception of their cousins to the south, they use

oil per capital more than any other people in the world", stated John Ness, geologist and official of the Imperial Oil Company, Ltd. in his speech to the Engineering Institute of Canada in this capital.

WEEKLY WIND-UP

For the second time in 1948 the Bank of Canada reduced its support of Dominion bonds but indicated in a statement here that the Bank "does not regard the increase in rates of interest which has taken place as one of the most important factors in combating a general rise in price levels." The bank even stated that it is "not in favor of a drastic increase in interest rates."

The Governor General, Viscount Alexander, told the Academy of Medicine here that the evacuation of the wounded by air during the war deserved special praise since it raised the morale of the troops to know that, if wounded they would be blown speedily back to hospital.

A combined air force formed by all the smaller nations of Europe would be the only way to discourage aggression by other countries, urged the famous French flier, Henri Houche addressing a meeting here, with M. Houche being French a representative in the International Civil Aviation Organization Council.

Vancouver Mayor Charles Jones

paid his first official visit to this capital and it is understood that he discussed with officials matters pertaining to his city taking over the Government-operated airport at Sea Island used by the RCAF during the war.

The Senate Tourist Committee was told by an official of the Canadian Government that only 15% of the United States Tourists stay three days or more when visiting Canada, though they spend 83% of the over-all amount of tourist money.

It is estimated that at least 30,000 Orangemen will concentrate here when a two-day celebration takes place in this capital in July 1948.

The Canadian Government does not anticipate saving U.S. dollars on imports of steel under its conservation program, though permits would be required for steel imports to make sure it was used in the type of construction wanted under the program.

The RCAF offers everything a young man wants!

You'll learn about the operation of modern aircraft and technical equipment. You'll make friends . . . master a valuable trade under the guidance of experts. And while you're still young enough to enjoy it, you'll be able to retire on pension for the rest of your life.

You need no previous experience or special training. And you draw full pay from the start. You'll have a chance to see Canada . . . perhaps take part in thrilling and important exercises such as northern transport flights or summer photographic surveys. It's a job in which you can take pleasure and pride.

YOU GET ALL THESE in the RCAF

- Continuous employment and pay.
- Technical trades training.
- Full opportunity for advancement.
- Progressive pay increases.
- Sports and recreational facilities.
- 30 days vacation a year with full pay.
- Medical, dental and clothing service provided.
- Retirement income assured.

Join the RCAF today!

is well illustrated by a tub with staves of varying lengths. The capacity of such a tub is obviously limited by the shortest staff. The same is true of soil in that its productive power is limited by the factor or element that is in shortest relative supply, by correcting this deficiency production is then determined by the next limiting factors and so on until all factors and elements are brought into balance. It is only in this way that yields and quality can be increased to the maximum for any particular soil and associated climate. Investigations not only show a

close relationship between these factors but also indicate in some measure the increased yields and high quality that may be expected when these factors are more fully understood and are brought into complete balance. Herein lies the great possibility of irrigation whether it is a large project covering thousands of acres or a small individual irrigation project operated in conjunction with a dryland farm or ranch.

In irrigation farming, with mixed charges, high yields on all of the irrigated farm are an economic necessity and especially when prices are low and increasing yields afford the

most effective means of reducing cost of production. In the case of small projects the need of increasing yields may be just as essential in order to secure maximum production from a limited water supply.

A major factor in securing the desired balance of factors in crop production under irrigation is the maintenance of organic matter at the level needed for maximum yield and quality. Manure from the barnyard or the feed lot provides an excellent source of organic matter and some plant food. In tests at the Experimental Station, Lethbridge, manure has been worth as much as \$5.00 a ton. Manure may be used to particularly good advantage on small irrigation projects.

For the most part however, organic matter is added to the irrigated soil largely through crop residue, and browing hay crops or plowing under crops such as sweet clover as green manure. Such a program of cropping needs to be planned over a period of

years and requires some cash outlay that may not be returned immediately. However, such soil improvements pay over the years and under present conditions provides opportunity for investing some of the surplus funds that farmers have been able to accumulate during the years of

better prices.

Moisture and fertilizer are important but the establishment of a systematic cropping program including soil improvement crops, usually is the first essential step in securing a balance in crop production under irrigation.
